Biomedical Variables Measurement

- 74 Biopotentials and Electrophysiology Measurement** *Nitish V. Thakore*
Introduction • The Origins of Biopotentials • Biopotentials • The Principles of Biopotential Measurements • Electrodes for Biopotential Recordings • The Biopotential Amplifier • Circuit Enhancements • Measurement Practices • Conclusions
- 75 Blood Pressure Measurement** *Shyam Rithalia, Mark Sun, Roger Jones*
Introduction • Measurement Techniques • Indirect Blood Pressure Measurement • Direct Blood Pressure Measurement • Reproducibility, Accuracy, and Reliability Issues and Recommendations for Corrective Measures • Blood Pressure Impact, Challenge, and Future
- 76 Blood Flow Measurements** *Per Ask, P. Åke Öberg*
Doppler Measurements • Indicator Dilution Methods • Plethysmography • Radioisotopes • Thermal Convection Probes
- 77 Ventilation Measurement** *L. Basano*
Ventilation • Instrumentation: Principles and Description • Future Perspectives
- 78 Blood Chemistry Measurement** *Terry L. Rusch, Ravi Sankar*
Introduction • Background • Measurements and Techniques • Combined Analysis Techniques
- 79 Medical Imaging** *James T. Dobbins III, Sean M. Hames, Bruce H. Hasegawa, Timothy R. DeGrado, James A. Zagzebski, Richard Frayne*
Introduction • Image Information Content • X-Ray Imaging • Computed Tomography • Nuclear Medicine • Positron Emission Tomography • Ultrasound Imaging • Magnetic Resonance Imaging
